

# Photovoltaic solar panel construction qualifications

What qualifications do I need to install a solar photovoltaic system?

In order to fit solar photovoltaic (PV) technology, a recognised qualification is required in the UK. You should have the following qualifications: NVQ/SVQ Level 3 in Electrical Installations, 18th Edition, inspection & Testing, Level 3 Award In the Installation and Maintenance of Small Scale Solar Photovoltaic Systems.

What is a Level 3 solar photovoltaic qualification?

The qualification provide learners with an understanding of solar photovoltaic systems installation, commissioning, and operation and maintenance. This Level 3 qualification is aimed at learners with a background as electrical, mechanical, civil and energy professionals or those in their last year of study in the above related fields.

What is a photovoltaic panel installer qualification?

This qualification is aimed at those who work as Installers of Photovoltaic Panels, primarily in domestic properties. to achieve the qualification. The grouping of optional units should allow all employed in the industry equal opportunity to complete the qualification. The qualification is at Level 2, although there may be individual units at

What is a solar photovoltaic system protection qualification?

know solar photovoltaic system protection techniques and components. This qualification is aimed at experienced and practicing electrical operatives. On application for the qualification, the Approved Centre (AO) will carry out an Initial Assessment of the learner's capability to complete the qualification.

How do I become a solar PV installer in the UK?

If you are interested in becoming a solar PV installer in the UK, there are certain steps you need to take. Firstly, it is important that you have an understanding of electrical circuits and electrical safety practices. You can obtain this by taking training courses such as NVQ Level 3 in Electrical Installation or equivalent.

How much does a solar PV qualification cost?

£660.00 (£792.00 inc VAT) This qualification is aimed at practicing electricians to develop the skills and knowledge required to safely and competently install, commission and handover solar PV systems. This course will be running across various locations and dates. Choose from one of the 9 events with open places below.

If you're looking to start your career in the solar industry, then look no further! This course provides each participant with an awareness through theoretical and practical training. This course is designed to make sure workers are aware of ...
