What is solid-state hydrogen storage?

Conventional PEC devices require downstream technologies to capture and store the generated hydrogen gas for its further use as an energy carrier or a fuel. Among various methods, solid-state hydrogen storage appears particularly attractive due to its safety, long-term stability, and application flexibility.

What is solar hydrogen?

Hydrogen production using solar power is referred to as solar hydrogen. PC water splitting is actively pursued for hydrogen production because it efficiently utilizes solar energy to address environmental and energy challenges. Photocatalysts driven by visible light are primarily used for solar energy conversion.

Should solar light be used for hydrogen generation and storage?

If proper materials and methods are established for solar hydrogen generation and solid hydrogen storage under ambient conditions, solar light used for hydrogen generation and utilization via solid oxide fuel cells (SOFCs) will be an efficient, safe, and cost-effective technique.

Is solid hydrogen storage a viable solution?

However, the widespread adoption of hydrogen energy is challenged by transportation and storage issues, as it requires compressed and liquefied gas storage tanks. Solid hydrogen storage offers a promising solution, providing an effective and low-cost method for storing and releasing hydrogen.

How can a solid-state hydrogen storage heating network save energy?

In terms of heat source selection, in addition to electric heating, the waste heat of fuel cells and internal combustion engines, or renewable energy sources such as solar energy and geothermal energy, can be used to build an efficient and energy-saving solid-state hydrogen storage heating network.

Can solid-state hydrides store hydrogen in solid form?

For storing hydrogen in solid form, solid-state hydride materials are anticipated to play a crucial role in developing safe, energy-efficient, and high-energy-density systems. To enhance the hydrogen storage capabilities of metal hydrides, a nanostructuring strategy has been employed.
