If your browser supports the automatic fetching of your location, then the Ascendant and house positions in the chart below will be correct and specific to your location. Otherwise, the planets will be correct but not the houses. Cafe Astrology Daily Transits interpretations of the transiting aspects are listed for current transits.

What are astrology planets & how do they affect us?

Each of the planets (which for astrology includes the sun and the moon) control a different aspect. In general terms they can be listed as: The Sun, Moon, Mercury, Venus and Mars are the personal planets which affect our personalities and immediate relationships. The more distant planets affect how we interact with the world in a more general way.

Which view shows all planets arranged around the Earth?

The view above shows all the planets arranged around the Earth as if they were located on a sphere with the earth in the centre - a geocentric view. This ensures all planets are shown in the correct zodiac sign. Which Planets are in retrograde? Planets glow as they go into retrograde.

Why do dwarf planets rise above and below the ecliptic?

Dwarf planet positions are also shown - but it should be realised that these objects often rise far above and below the plane of the ecliptic. This is because their orbital planes are tilted with respect to the ecliptic - by more than 40 degrees in some cases.

Planetary hours and Moon details are included. Note that while the planetary hours and other details on the page are noted in the time zone of your location, the Moon details table is in GMT. To convert, you might consider referring to Time and Date's Time Zone Converter. Below the interpretations, transiting midpoints are listed.
