

Possible green power options

A regenerative path would pair climate-sensitive power mandates with proactive investment in coal-belt livelihoods, ensuring that workers and communities become co-authors of the new economy rather than casualties of it.

Is It Possible To Replace Fossil Fuels With Nuclear Power? The authors propose a plan to replace fossil fuels with low-carbon fuels, such as grid electricity, gas for heating, gasoline, ...

Alternative energies include renewable sources --such as solar, tidal, wind, biofuel, hydroelectric, and geothermal --and nonrenewable nuclear power (considered alternative but not renewable because it relies on uranium, ...

Expand voluntary green power options. Corporates, like RE100 members, stand ready to invest in the country's energy transition. The private sector is the leading consumer of electricity in the ...
