

Power bar with battery backup

Why is a UPS battery backup important?

It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down. This makes a UPS battery backup especially valuable for computers, preventing work from being lost or files from being corrupted by an improper shut-down.

Why do I need a backup battery?

Backup battery power keeps gaming consoles, stereos, and chargers running. Protect sensitive televisions, projectors, satellites, and cable boxes from power surges and spikes. How long will the UPS power my systems after the power goes out?

Can a UPS battery backup cause a power outage?

In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply (UPS) also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics.

What is a consumer-grade UPS backup device?

Consumer-grade UPS backup devices are typically classified as "standby UPS power." This means the UPS plugs into an electrical outlet, using power to keep its backup battery constantly charged. It also supplies a PC or other electronic devices plugged into the UPS with AC power via that wall outlet.

Is the APC ups be425m a good battery backup?

If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you. Its 425VA/225W power won't keep your desktop computer running for several minutes after a blackout, but it's perfect if you have a few smaller devices you need to keep powered up.

Which APC battery backup is best?

The APC BR1500G is an excellent battery backup with AVR and surge protection. It allows for easy cell replacement and the ability to add external backups. If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you.
