

Power systems rolls royce

The Business Unit Power Systems of Rolls-Royce provides world-class power solutions and complete life-cycle support under our product and solution brand mtu. Through digitalization and electrification, we strive to develop drive and power generation solutions that are even cleaner and smarter and thus provide answers to the challenges posed by the rapidly growing societal ...

"With this new generation of diesel engines in the power range up to nearly 1000 kilowatts, we are continuing to invest in our mtu engine portfolio and offer our customers worldwide cutting-edge technology for reliable and sustainable stationary power generation in critical applications," explained Dr Jörg Stratmann, CEO of Rolls-Royce's ...

Rolls-Royce Power Systems is headquartered in Friedrichshafen in southern Germany and employs around 9,000 people. The product portfolio includes mtu-brand high-speed engines and propulsion systems for ships, power generation, heavy land, rail and defence vehicles and for the oil and gas industry as well as diesel and gas systems and battery ...

Rolls-Royce Power Systems is headquartered in Friedrichshafen in southern Germany and employs more than 10,500 people. The product portfolio includes mtu-brand high-speed engines and propulsion systems for ships, heavy land, rail and defence vehicles and for the oil and gas industry. The portfolio also includes diesel and gas systems and ...

OverviewHistoryOperating brandsMTU Onsite EnergyMarine enginesSee alsoExternal linksRolls-Royce Power Systems AG (formerly Tognum AG) is a German company owned by Rolls-Royce Holdings with holdings in engine manufacturing brands and facilities. The company previously traded, from 2006 to 2014, as Tognum AG. Prior to 2006, the core company - MTU Friedrichshafen GmbH - was a constituent of DaimlerChrysler Powersystems Off-Highway.

MTU is a product and solution brand of Rolls-Royce that provides world-class power solutions and complete life-cycle support. The brand with more than 3 decades of history in Malaysia and amongst the largest population of engines in Malaysia, with a presence cutting across all industries including defence, commercial marine, power generation ...

Rolls-Royce Power Systems significantly increased its operating results, sales and order intake in the first half of 2024. This was driven in particular by business activities in the power generation segment, with strong demand for data centre equipment, growing governmental business and effective efficiency measures.

The Power Systems division of Rolls-Royce is presenting the concept of a new mtu on-board power generator with significantly higher output for submarines at the Euronaval trade fair in Paris. The on-board charging
