

Advancements in battery technology and supportive policies help reduce emissions and promote energy efficiency, significantly impacting global EV adoption. This paper explores the material ...

Kalmar has introduced its second-generation lithium-ion (Li-ion) battery solution for its range of electrically powered counter balanced equipment: reachstackers, empty container handlers ...

Two projects led by the University of Oxford have received a major funding boost from the Faraday Institution, the UK's flagship institute for electrochemical energy storage research. The funding is part of a £19 million ...

The global lithium battery hybrid coated separator market is experiencing robust growth, projected to reach \$395 million in 2025 and maintain a Compound Annual Growth Rate (CAGR) of 7.1% ...

Octillion Power Systems, a California-based supplier of high-density lithium-ion battery packs for electric vehicles of all types, has expanded its existing partnership with Vision Marine ...

Panasonic unveils its new Kansas EV battery factory, boosting production with 32 GWh capacity plans. Dürr and GROB factory concept compares a state-of-the-art process with a next-generation process that ...

A research team in South Korea has developed a breakthrough transfer printing technology that forms protective thin layers on lithium metal surfaces--an innovation poised to solve the long-standing dendrite issue plaguing next ...

Pol's team earned a Guinness World Record for the 'lowest temperature to charge a lithium-ion battery' by demonstrating reliable operation at -100°C. Traditional lithium-ion batteries face ...

A Cleaner, Cheaper Way to Make High-Performance Lithium-Ion Batteries A new breakthrough in battery chemistry could eliminate the use of cobalt and nickel in lithium-ion batteries.

Exide charts growth path with focus on lead-acid, lithium-ion batteries Sustainability is embedded in our operations from green energy adoption and eco-friendly products to expanded recycling capacity and green logistics, Roy ...

A team of Chinese researchers has made a groundbreaking breakthrough to revive aging lithium batteries by injecting a 'shot' of lithium ions, potentially extending their lifespan from the typical 6-8 years or 1,000-1,500 ...

Bluetooth Lithium Battery Explained: Benefits, Applications, and the Role of Smart BMS The Bluetooth lithium battery has become a contemporary power source for a variety of consumer, ...

In a major step forward for sustainable energy technology, researchers at Worcester Polytechnic Institute (WPI), led by Professor Yan Wang, William B. Smith Professor of Mechanical and ...

The global lithium-ion battery polyolefin separator market is experiencing robust growth, driven by the escalating demand for electric vehicles (EVs) and energy storage systems (ESS). The ...

A 48V lithium ion battery 200Ah is a powerful, high-capacity battery designed for demanding applications like solar, electric vehicles, and industrial uses. It offers long lifespan, fast ...

Beijing has added battery cathode material preparation technology to its restricted export list. The move affects lithium iron phosphate (LFP) and related technologies, requiring export licences ...

Tesla is once again making headlines with its innovative approach to electric vehicle (EV) battery technology. The introduction of Tesla's new lithium-iron-phosphate (LFP) battery tech marks a ...

This study assesses the material, environmental, and economic performance of closed-loop lithium-ion battery (LIB) recycling amid China's electric vehicle ambitions, indicating that a ...

Praia lithium-ion battery technology
