

GB/T 20042.7-2014 Proton exchange membrane fuel cells.Part 7: Test method of carbon paper properties GBT20042.7-2014, GB20042.7-2014

Bipolar membranes (BPMs) play a vital role in electrochemical applications, where robust interfacial design is essential for efficient ion separation. This study investigates the effects of ...

By type, the market is divided into proton exchange membrane fuel cell, solid oxide fuel cell, phosphoric acid fuel cell, and others. The Proton Exchange Membrane Fuel Cell (PEMFC) segment dominates the global ...

GB/T 38914-2020 Evaluation method for lifetime of proton exchange membrane fuel cell stack in vehicle application GBT38914-2020, GB38914-2020

Unlocking Proton Exchange Membrane Fuel Cell Performance with Porous PtCoV Alloy Catalysts PtCoV ...

Abstract Proton exchange membrane water electrolysis is a key technology for hydrogen production, particularly when powered by renewable energy. To ensure operational stability ...

Synthesis and characterization of sulfonated poly (ether ether ketone) for proton exchange membranes ...

Proton exchange membranes (PEMs) are also known as polymer electrolyte membranes, typically consist of a thin solid polymer electrolyte. PEMs have a wide variety of application in the fields ...

Boosting the durability of RuO<sub>2</sub> via confinement effect for proton exchange membrane water electrolyzer RuO<sub>2</sub> ...

Assessing Utilization Boundaries for Pt-Based Catalysts in an Operating Proton-Exchange Membrane Fuel Cell ...

Proton exchange membrane (PEM) electrolyzers are promising devices for hydrogen production. They exhibit the superiorities in high operational current densities exceeding 2 A cm<sup>-2</sup>, ...

GB/T 44243-2024 Determination of sulfur compounds, formaldehyde and organic halides in ...

GB/T 20042.6-2024 Proton Exchange Membrane Fuel Cell Part 6: Bipolar Plate

Characteristics Test Method GBT20042.6 ...

Through an investigation of the effect of the ionomer content in the formula on performance, it is clarified that a closer bond between the catalyst layer and the proton exchange membrane ...

This study systematically investigated the physicochemical properties and proton exchange membrane fuel cell (PEMFC) performance of perfluorosulfonic acid (PFSA) membranes with ...
