Is Canadian Solar a good stock to buy in 2022?

Solar stocks, in general, have surged as of late. After taking a large hit in price over the course of 2021, Canadian Solar recovered in a big way in 2022 and is one of the best-performing renewable energy companies in the space at the time of writing. The stock has still dipped significantly from all-time highs achieved in 2021.

Are solar stocks a good investment in Canada?

Solar stocks in Canada have been around for a while, but have remained relatively unknown due to high costs, and investors are starting to gain interest. If you're looking for some US-based companies that are helping the world's oceans, have a read of this piece.

Are Canadian renewal energy stocks a good investment?

For those with long-term outlooks, Canadian renewal energy stocks are a great investment. While there has been significant attention placed on the decarbonization of the economy and the shift toward renewable energy, the industry is still relatively new compared to traditional fossil fuels.

Are green energy companies a good investment in Canada?

Plus, much like Canadian gold stocks, fossil fuel companies rely heavily on a commodity and can be quite cyclical. But all while this is happening, green energy companies here in Canada are quietly amassing large asset bases and production capacities.

As a result, renewable energy stocks are thriving. In 2020, the MAC Global Solar Energy Index posted a 233% gain. Renewable Energy Industrial Index, or RENIXX, is up over 122% in the last 12 months.
