

Renewable energy is fascinating because it is a very long-term asset. At the moment pension funds can either buy property, which isn't doing very well right now, or invest in equities, which isn't a very good bet either. So I think that maybe they should be investing in renewable energy projects, which will happen in the future out of ...

This book serves as a valuable resource for students and professionals without extensive background on energy and environmental projects and a limited knowledge of finance, and it offers a refresher on core concepts in basic finance necessary to understand renewable energy project finance-ultimately helping the reader understand how the ...
