Renewable energy netflix

and in more than 30 languages and 190 countries. ... Percentage renewable Total energy consumed (MWh)
Percentage grid electricity Percentage renewable Discussion of the integration of environmental considerations

Renewable energy comes from unlimited, naturally replenished resources, such as the sun, tides, and wind. Renewable energy can be used for electricity generation, space and water heating and cooling, and transportation. Non-renewable energy, in contrast, comes from finite sources, such as coal, natural gas, and oil.

Introduction to Renewable Energy. This is our Stanford University Understand Energy course lecture that introduces renewable energy.
