Renewable Energy has hit the highest price it has traded for over the last year (52 week period). This is a technical indicator that can be used to analyze the instrument's current value and predict future price movement.

Renewable energy comes from unlimited, naturally replenished resources, such as the sun, tides, and wind. Renewable energy can be used for electricity generation, space and water heating and cooling, and transportation. Non-renewable energy, in contrast, comes from finite sources, such as coal, natural gas, and oil.
