

The utility-scale solar market remains relatively resilient, driven by auctions across Europe that incentivise flexible solar projects that are combined with storage or wind. BRUSSELS, Belgium ...

Sympower Funding: EUR57.8M Sympower unlocks revenue streams by maximising the value of flexibility across energy markets and industries. Its proprietary platform balance the supply and demand of electricity across ...

Belgium is projected to reach around 33.6 GW of installed PV capacity by the end of 2035, according to a new report from Belgian grid operator Elia. The country is also predicted to see ...

Google enters long-duration energy storage (LDES) with a global commercial partnership and investment in Energy Dome. Energy Dome's CO2 Battery stores clean energy for 8-24 hours, ...

This obligation shall be treated as fulfilled only when at least 85% of the total energy stored is procured from Renewable Energy sources on an annual basis. There are several energy storage technologies available, broadly - ...

Energy islands could also act as sites for electricity storage or for producing renewable hydrogen. The Belgian "Princess Elisabeth Island" in the North Sea will bundle up to 3.5 GW of offshore ...

Belgium plans to increase its photovoltaic (PV) capacity to 33.6 GW by 2035 as part of its draft national energy and climate plan (NECP). This plan outlines the country's strategies for ...

The projects add to 77 decarbonisation initiatives that signed their grant agreements in March, stepping in to use the budget freed up by applications withdrawn from the programme. The list ...

Battery storage, hybrid systems, combining solar, wind and BESS as well as digital technologies are increasingly vital for integrating variable renewable energy. Artificial intelligence (AI) ...

The year 2024 was a milestone in the global energy transition. Renewable energy didn't just make gains, it shattered records and established itself as the undisputed economic powerhouse of ...

At the end of 2019, Belgium submitted to the European Commission the final version of the National Energy and Climate Plan for 2021-2030. Besides energy and climate, mobility, science policy, finance, defence, agriculture, ...

ENGIE's Renewable & Batteries Benelux team is looking for a Business Developer Renewable Energy &

Renewable energy storage belgium

Batteries (M/F/X). In this strategic role, you will contribute to the identification, ...

AI data centers" massive energy consumption raises environmental concerns, but BESS enables greener operations. By storing excess renewable energy from solar or wind, batteries provide ...

University of Antwerp, Belgium invites online Application for number of Fully Funded PhD Degree at various Departments. We are providing a list of Fully Funded PhD Programs available at ...

Google has signed its first partnership with a long-duration energy storage (LDES) company. The tech giant signed a long-term partnership with Energy Dome to support multiple commercial ...

By promoting collaboration between public and private sectors, Belgium aims to create an environment where enterprises feel supported in their transition towards sustainable energy practices. Embarking on a thermal ...

To this end, Belgium is already laying the groundwork for battery farms capable of storing surplus energy. It also has positioned itself as a pioneer of hydrogen as an alternative to liquefied natural gas (LNG) that remains ...

Detailed info and reviews on 31 top Energy & Cleantech companies and startups in Belgium in 2025. Get the latest updates on their products, jobs, funding, investors, founders and more.

Heating, ventilation, and air-conditioning (HVAC) systems account for the largest share of energy consumption in European Union (EU) buildings, representing approximately 40% of the final ...

In a recent development, the Executive Committee of CREG (Commission for Electricity and Gas Regulation) approved Elia"s revised tariff proposal for the 2024-2027 regulatory period. This approval sheds a sharp ...
