I too would like atleast 30"-40" of extension from the solar port to the Renogy suitcase (plus the 4" inside to the battery). It sounds like I will be much better off removing the Renogy Voyager 20A PWM controller from the panel and mounting inside even though Renogy says that voids the warranty :-).

When wiring solar panels in a series, the voltage is additive, but the amperage remains the same. Parallel connections are mostly utilized in smaller, more basic systems, and usually with PWM Controllers. A benefit of wiring in parallel is that if one solar panel experiences a failure, the other solar panels will continue to produce power.
