

Review for sunpower solar company

Is SunPower solar a good company?

In general, SunPower receives more positive reviews than most national providers, and it even rivals some smaller regional and local companies. We read through hundreds of SunPower Solar reviews to gauge the overall customer sentiment, which we'll explain in the following sections.

Is SunPower a bad company?

Any company is also going to have its fair share of negative reviews, and a company the size of SunPower is no exception. The biggest complaint we've seen from customers is about customer service, so it's clear that the service is spotty.

Does SunPower still make solar panels?

After 2020, SunPower no longer manufactured its own solar panels. Instead, the company and its manufacturing arm, Maxeon, had an exclusive agreement for Maxeon's M-Series panels. In March 2024, the M-Series exclusivity agreement ended as SunPower fell behind on payments.

Does SunPower offer direct solar panels?

SunPower no longer offers direct solar panel installations. In April 2024, SunPower ceased its home solar panel installation operations, so you cannot get solar panels installed directly by SunPower. However, the company is still managing its Dealer Network, meaning you can access SunPower financing plans and warranties through certified partners.

Does SunPower offer M-series solar panels?

SunPower dealers now have access to a wide variety of panel brands, and installers outside of SunPower's network will offer M-Series panels. The exact panels you will be offered depend on the SunPower dealer you work with. SunPower also offers an energy storage solution as a part of its line of solar products.

Are SunPower solar panels a good choice?

SunPower offers some of the most efficient solar panels on the market. Paired with a great warranty option, this makes SunPower an ideal choice for consumers looking to shrink their carbon footprint and save on electricity bills. SunPower's equipment is top-notch, which means you'll be paying top dollar.

Cost (20%): The cost is the only area where SunPower is really lacking. The panels come with some of the highest prices per watt in the industry of \$3.30 on average. This is far higher than the industry average of \$2.66, so the company loses quite a lot of points here. Still, the overall value is outstanding and worth the money, in our opinion.

Pros. Installs high-performance panels. Extensive local dealer network. Great warranty coverage. **Cons.** Expensive. Poor customer service reviews. Financial issues. Find out how much a solar system would cost for
