

Nordic countries have long been at the forefront of renewable energy sources, which is key to their strategy to combat climate change. This commitment to sustainability is evident in their ...

In June 2025, Iceland achieved its first-ever full calendar month powered entirely by renewables generating 100% of its electricity from geothermal and hydropower, with an impressive 90% of ...

While Iceland stands proudly as a global poster child for clean energy, with nearly 100 % of its electricity coming from renewable sources, the reality behind this green facade is murkier than ...

Almost 100% of its electricity comes from renewable sources, primarily hydropower and geothermal energy. The island's volcanic geology makes it one of the few countries that can tap into geothermal heat on such a ...

The country's heavy investment in renewable energy--especially wind and hydro--means fossil fuel use is minimal. Urban planning prioritizes walkability and bike-friendly infrastructure, ...

The limiting factor to growth in Iceland is the power grid. Currently, roughly six percent of electricity generated in Iceland is used for data centres, and the energy supply is not as large ...

Iceland grows bananas--but that's just the start. Discover how this Arctic island became one of the richest countries on Earth by harnessing geothermal heat, hydro power, and smart energy ...

Iceland's EV reality falls short of its renewable promise The Golden Circle may promise epic scenery -- but in an electric vehicle, the biggest question isn't what you'll see. It's whether ...

Results based finance Energy Compacts Launched by UN-Energy (United Nations mechanism for inter-agency collaboration in the field of energy) at the 2021 High-Level Dialogue on Energy - Energy Compacts are voluntary, ...

The Hellisheidi Power Station near Reykjavik, Iceland, stands as one of the world's largest geothermal plants, generating 303 megawatts of electricity while also supplying hot water to over 200,000 residents.

Riyadh, July 28, 2025, SPA -- Minister of Energy Prince Abdulaziz bin Salman bin Abdulaziz inaugurated on Sunday the live demonstration of Climeworks' first Direct Air Capture (DAC) ...

One of the Canary Islands is working to make renewable energy more accessible with geothermal exploration, as reported by ThinkGeoEnergy. The island of Tenerife is partnering with Energ&#237;a ...
