

Dry mouth can occasionally happen if you're dehydrated or feeling particularly anxious. But when your mouth is dry all the time (xerostomia), it could point to an underlying health condition. Certain medications can also cause it. Left untreated, xerostomia makes you more vulnerable to tooth decay, gum disease and other dental issues.

This article examines the current situation with the level of introduction of renewable energy sources (RES) into the electric power industry of Latvia, and the Baltic States as a whole, ...

Dry mouth, also called xerostomia (zeer-o-STOE-me-uh), is when the salivary glands in the mouth don't make enough saliva to keep the mouth wet. Dry mouth often is due to aging, the side effects of certain medicines or radiation therapy for cancer. Less often, a condition directly affecting the salivary glands can cause dry mouth. You also may experience dry mouth temporarily if ...

Dry mouth is the feeling that there is not enough saliva in the mouth. Common causes of dry mouth in older adults include side effects of certain medications and dehydration, when you lose more fluid than you take in.

Latvia has been progressively increasing its focus on renewable energy. The country's investment in renewable energy technologies is part of a broader aim to reduce dependence on fossil fuels and decrease greenhouse ...

The key project will be the Amber Flow Fuels plant for the production of renewable fuels (HVO and SAF), which will meet the needs of the entire Baltic market for SAF and export 70% of the ...

Dry mouth, or xerostomia, particularly affects older adults and can significantly impact quality of life, oral health, and overall well-being. This condition occurs when salivary glands don't produce enough saliva, leading to various oral health complications. Understanding the causes and management strategies of dry mouth can help seniors reduce the side effects of this uncomfortable [...]

Hydrogen storage is emerging as a long-duration solution for renewable energy systems, offering grid stability despite lower efficiency and higher costs. The Oxford Institute for Energy Studies ...

As renewable energy penetration increases, the integration of high voltage battery systems into the grid will become more critical. Smart grid technologies and advanced energy management ...

In 2023, solar PV accounted for about 10% of Latvia's installed capacity and less than 4% of its power generation. Latvia aims to reach a share of 57% of renewables in the final energy ...

Riga increased renewable energy penetration

Dry mouth or xerostomia is a common condition found in aging adults. Senior patients struggle with this condition due to various reasons, but it's also something often times overlooked by caregivers.

Despite these constraints, the long-term outlook for the EES market remains exceptionally positive. The increasing penetration of renewable energy sources, coupled with the growing ...

Dry mouth in the elderly is often caused by medications and can have a big impact on a senior's health. Talk to your aging loved ones doctor or dentist about any difficulty or changes in eating, tasting, swallowing, talking or denture retention.

European renewable energy provider SUNOTEC has finalized the acquisition of SIA DSE Lazas Solar's solar and energy storage project in Latvia from Danish Sun Energy. This transaction ...

Renewable energy communities (RECs) are increasingly recognized as pivotal instruments in the global energy transition, offering decentralized, participatory, and sustainable solutions for ...

Increased life expectancy has led to Xerostomia (dry mouth) becoming a more common health condition among the elderly population. It is estimated that approximately 30% of the population 65 years and older experience xerostomia.¹ While dry mouth isn't a natural part of the aging process, it is most common in

There are many diseases such as Xerostomia and Salivary Gland Hypofunction, radiation therapy in the head and neck area, and medications that cause dry mouth. In this article, we present several treatment options for older patients experiencing dry mouth. Sections Mouth Moisteners Salivary Stimulators Toothpastes Topicals Prescription Dry Mouth Medications Non-pharmacologic Interventions Cost ...

Dry mouth (salivary hypofunction, xerostomia) is a common problem among older people. It causes significant oropharyngeal disorders, pain and an impaired quality of life. Dry mouth has many causes, from local salivary disorders to a plethora of medications and medical conditions. Treatments are designed to correct the underlying cause and/or to enhance salivation with topical and systemic ...

Dry mouth, or xerostomia, is an irritating health condition that many older adults deal with on a daily basis. Dry mouth is characterized by reduced saliva production, and it can cause complications like difficulty eating, bad breath, mouth sores, and an increased risk of tooth decay. This guide will cover four common causes of dry mouth.

The transformation of Kundzinsala into the new center of Riga port involves several large industrial projects, specifically in the green energy production sector. Producing renewable ...

Energy flexibility is ensured for the long-term perspective by stockpiling raw materials (fuels) for plants or

Riga increased renewable energy penetration

using hydro reservoirs to store energy for the future outlook. Maintaining energy ...
