

Run in sun

Is running in the Sun a good idea?

Research reveals surprising perks of running in the sun - if you take care out there. Research reveals surprising perks of running in the sun - if you take care out there. - By K. Aleisha Fetters A runner's relationship with the sun is complicated.

What are the benefits of running in the Sun?

One of the main benefits of running in the sun is the natural production of vitamin D. When I run outdoors on a sunny day, my skin is exposed to sunlight, which triggers the synthesis of vitamin D. This essential nutrient helps in strengthening my bones, boosting my immune system, and even reducing inflammation.

Why do runners hate the Sun?

A runner's relationship with the sun is complicated. You love soaking up its warmth and energy, but you hate when it leaves its mark - age spots, tan lines, painful burns - and you dread the long-term damage that may result. There are, of course, reasons to be wary, especially if you're logging lots of summer miles.

Is the sun bad for your skin?

Sun is bad news for skin... The sun's ultraviolet rays can cause skin cancer, and runners may be especially vulnerable. A study in Archives of Dermatology found that marathoners showed increased numbers of abnormal moles and age spots, putting them at higher risk for malignant melanoma.
