

Russians make their own solar power

Does Russia have a solar power plant?

Nevertheless, in the past three years Russia has been rapidly developing solar energy. Kosh-Agachskaya solar power plant in the Republic of Altai was opened in 2014. In 2014, Russia opened its first solar power plant, and the country has 12 today. Soon the 13th will be launched.

Does Russia have enough solar energy?

There is no sun there!' Well, our data tells us differently." Moscow-based renewables company Unigreen Energy, which has received a government guarantee that it will be paid extra for the power it adds to local grids, said Russia has more than enough insolation-- solar radiation hitting an object -- to produce solar energy.

Why did Russia start building solar power plants?

Buribaevskaya solar plant in Bashkortostan. Russia began building solar power plants not because it was in vogue, but because their increasing effectiveness made them profitable in regions that are very remote from traditional energy sources, and which at the same time have much sunshine.

Is solar energy on the verge of a major expansion in Russia?

Vadim Braidov /TASS Solar energy in Russia might be on the verge of a major expansion, thanks to a government support program for renewable energy sources, industry experts told The Moscow Times. Russia, the world's fourth-largest emitter of greenhouse gases, has historically relied on its vast oil and gas reserves to bolster its economy.

Is solar energy a good investment in Russia?

Even though demand for solar energy in Russia is low, the Moscow-based company, Hevel, is producing solar modules with an energy conversion efficiency of 22 percent, which is the world's highest. In addition to Hevel, only two other companies in the world produce solar equipment with similar efficiency: Panasonic (Japan), and Sun Power (U.S.).

How many solar power plants will Russia use in 2022?

In the near future, Russia plans to use another 334 MW of solar power in the Orenburg, Saratov, Volgograd and Astrakhan regions, as well as in the Altai, Buryatia and Bashkortostan republics. By 2022, Hevel plans to build solar power plants with capacity of up to 1 GW.
