

Model predictive control (MPC) has emerged as a powerful control strategy for microgrids due to its ability to handle complex dynamics and optimization problems. This study aims to conduct ...

A microgrid is a localized energy system that can operate independently or in tandem with the utility grid. It intelligently manages multiple energy sources to deliver reliable cost-effective power.

The centralized control is one in which central system manages all operations making it efficient but vulnerable to single-point failures [34 - 37]. In decentralized control, each component is ...

FOOD CONTROL??????,??????SCI??????,?????? "FOOD CONTROL?" ?????? ?????????????????? ...

The multiagent systems are one of the recent advanced strategies that use multiple autonomous agents, and it is often integrated with other control techniques to ensure optimal performance ...

The Government of Serbia has sent a new request to the Office of Foreign Assets Control (OFAC) of the United States Department of the Treasury to extend the operating license for Industrial ...

Speaking at the inauguration of the Petka solar plant, Serbian energy minister Dubravka Dedovic Handanovic said a number of strategic projects, including a deal for 1 GW of solar alongside...

The application of a virtual synchronous generator (VSG) to provide virtual inertia in isolated microgrids has emerged as a promising control strategy for converter-inter-faced renewable ...

This trend will likely lead to more specialized software solutions tailored to specific applications and microgrid configurations. Finally, the increasing use of AI and machine learning in ...

The control system uses local controllers for each device in the cluster and a dynamic centralized energy management system to coordinate optimally energy dispatch and distribution among ...

Abstract The interlinking converter, an important device in a hybrid AC-DC microgrid, undertakes the task of power distribution between the AC sub-microgrid and DC sub-microgrid. To ...

As more countries rethink where and how they store their national wealth, Serbia has made a bold move: it's bringing all its gold back home. The Balkan nation is pulling roughly \$6 billion worth of gold from foreign vaults--a decision rooted ...
