

In a significant development for the engineering and mining sectors in Sierra Leone, Bravura A.S., Africa's largest mining company, has officially opened its recruitment process for geologists, ...

July 16, 2025, Shenzhen - Global lithium iron phosphate battery suppliers XIHO Energy welcomed a visit from an important Serbian customer representative today. Accompanied by the ...

It offers two battery options, lithium iron phosphate and ternary lithium. The pure electric range can reach up to 200km (CLTC conditions), balancing performance and environmental ...

As of July 1, throwing any device containing a lithium-ion battery in the trash is illegal in New Hampshire. Instead, transfer stations and retailers are offering collection boxes to recycle the ...

Minister of Energy Kanja Sesay described the Compact as "a game-changer," noting that "reliable electricity is one of the greatest barriers to investment in Sierra Leone. This program ...

In a groundbreaking development poised to reshape the electric vehicle industry, scientists have unveiled an innovative lithium-ion battery technology that dramatically cuts charging times by ...

Amita Technology, a local Thai company and the first lithium-ion battery gigafactory in ASEAN, is committed to completing Thailand's electric vehicle (EV) ecosystem by developing battery manufacturing from upstream to ...

Thus, growth in lead acid batteries is expected to enhance the market for the lead dioxide materials segment. Based on battery type, lithium-ion segment is expected to grow at the fastest rate during the forecast period. The ...

Artificial Intelligence is transforming lithium-ion battery technology by optimizing performance and safety through data analysis and real-time adjustments, with AI monitoring battery health, ...

Kalmar has introduced its second-generation lithium-ion (Li-ion) battery solution for its range of electrically powered counter balanced equipment: reachstackers, empty container handlers ...

The market is expected to expand from approximately 700 GWh in 2022 to over 4 TWh by 2030. Since their introduction by Sony in the early 1990s, conventional lithium-ion batteries have ...
