

# Small solar panels installed on the roof

Can solar panels work on a flat roof?

Yes, solar panels can work just as well on a flat roof as on a pitched roof, provided they are correctly angled to capture the maximum amount of sunlight. A good racking system can tilt the panels to the optimal angle, ensuring they receive sufficient sunlight throughout the day, which maximises their efficiency.

How much does it cost to install solar panels on a flat roof?

We estimate installing flat roof solar panels for the average 3-bedroom household in the UK would cost around £10,500, including a battery. Typically, the cost of solar panels on a flat roof is more expensive than on a sloped one due to the added cost of the mounting system.

Can solar panels be installed on a roof?

“The solar panels will need to be mounted on the roof by installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.

How do you mount solar panels on a flat roof?

Your solar panel installer will recommend the best tilt angle for your panels and the most suitable mounting technique, informed by which direction your roof faces. There are a few different mounting options available for flat roof solar panels, depending on the condition of your roof, the direction it faces and how much you want to spend:
