

Solar Power Generation Endorsement Card

Do solar panels have a Smart Export Guarantee (SEG)?

The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme. What is the Smart Export Guarantee?

Do generators need a SEG tariff?

All generators who wish to receive payment for the electricity which they export back to the National Grid will need to apply to a SEG licensee (an electricity supplier which offers a SEG tariff). SEG licensees must offer a SEG tariff to all eligible generators.

What is the Smart Export Guarantee (SEG)?

Under the Smart Export Guarantee (SEG) you will be paid for every unit of electricity that you feed back. You won't be paid for any that you use yourself. You need to have a renewable electricity generating system that meets the SEG eligibility requirements. You must have a meter capable of providing half-hourly export readings.

Can solar energy be exported back into the National Grid?

But that excess energy can be used elsewhere, by exporting it back into the National Grid, which then distributes it to wherever it is needed. The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme.

Are export tariffs a good idea for solar PV?

For homes with solar photovoltaic (PV) panels, export tariffs like the SEG are a great way to bolster your energy bill savings. In this article, we'll explore how the SEG works, the benefits for solar PV system owners, and how it's shaping greener living in the UK.

Do I need a smart meter to receive SEG payments?

Some suppliers do require you to have a smart meter in order to receive SEG payments. Having one will also ensure you're paid accurately for the energy you export, and will mean you don't have to take manual readings - plus it may soon become compulsory, so we would advise having one.
