Solar powered exhaust fans are a great way to start. These exhaust fans use the sun to generate power, so choosing one will help you save money year after year while also being better for the environment. They can also improve ventilation in your home because they prevent mold and mildew from growing, leaving you with plenty of room to breathe.

Many solar fans are not going to be as powerful as most plug-in or hard-wired types, but the best solar-powered fans will have excellent panels that provide ample energy, as well as optimally designed fan blades, motors, housing, and overall structure to make the airflow as strong as possible.

Runs directly from the solar panel, and provides a breeze all day when the sun is shining and runs slower when there are clouds. Model SCF-56 - Solar powered Ceiling Fan with 1400 mm diameter, white steel fan blades. Comes complete with 40-watt 12V polycrystalline solar panel (460 x 672 x 30mm)

If you are using a fan that requires AC power, you would plug the solar panel into an inverter and plug the inverter into a fan. The inverter inverts the DC energy from the solar panel into the AC energy required by the fan. If you plug a DC energy solar panel into an AC energy gadget, you will quickly burn out the battery or motor on the gadget.
