Under a solar lease, this third-party owner (e.g., a solar company) installs solar panels on your property and then sells you the electricity produced at a predetermined monthly rate. Companies calculate this rate based on the estimated annual production of your solar system and include this rate in your contract.

Renting out your own roof space for the operation of a solar system offers the owner a lucrative secondary income stream. We operate the system and feed the electricity into the grid receiving a remuneration for the sale of energy. The roof owner can benefit by renting out his roof space without having to invest himself.

At its core, a solar lease is simple. Instead of making electricity payments to a utility, you make them to a solar company that installed a solar system on your roof. There are two types of solar leases: Fixed monthly lease;

Solar companies that rent your roof

Power Purchase Agreement (PPA) In a fixed monthly lease, you pay a flat fee every month. For example, if your average ...

Under the rent-a-roof scheme in the UK, numerous companies engage in installing solar panels. These companies typically enter into a lease agreement with homeowners for around 20-25 years, as this is generally how long solar panels last, during which they undertake the installation and maintenance of these panels.

Customers who choose to lease solar panels may find themselves in circumstances where they want to end their lease, such as if they are moving to a new home or they find that the lease payments plus electricity from the grid -- if their system wasn't sized properly -- end up costing them more.
