

Solar company liability for damage to home

Are solar panels liable for bodily injury & property damage?

While litigation involving solar panels is sparse, the following scenario highlights the potential bodily injury and property damage claims that manufacturers, installers and disposers may face. A manufacturer establishes a processing plant in Rural Town, USA.

What happens if a solar company is liable?

Here are a few potential outcomes: If the court determines that your solar company is indeed liable for the issues you've experienced, they may award you compensation to cover the costs of any damages you've incurred. This can include repair costs, property damage, and any financial losses resulting from the solar installation.

Does home insurance cover solar panels?

When you file a home insurance claim for solar panel damage, you'll need to pay your policy deductible before your insurance provider pays out for the damage. In most cases, you'll be covered under one of two home insurance coverages (dwelling or other structures) depending on whether the panels are attached to your home or not.

Can a solar system cause damage to your property?

In some cases, the installation of a solar system can cause damage to your property. If your solar company fails to properly install the system or causes damage during the installation process, you may be able to take legal action to seek compensation for repairs or other damages.

Do I need liability insurance if I generate solar power?

In some states, utility companies require customers to carry liability insurance if they generate solar power. By requiring liability insurance, the utility is protecting itself from legal expenses (related to injury or property damage) caused by a customer's net metering system malfunctioning.

Can I sue a solar company?

If your solar company fails to properly install the system or causes damage during the installation process, you may be able to take legal action to seek compensation for repairs or other damages.
