

## Solar company ohio

Although not considered a leading state in sustainability, Ohio's solar energy use is slowly growing. According to the Solar Energy Industries Association (SEIA), Ohio ranks No. 22 in the nation for solar technology adoption, up from No. 31 in 2022. It has a less aggressive Renewable Portfolio Standard (RPS) than other states, with plans to generate 8.5% of the ...

The following is a list of what we believe are the best solar companies in Ohio. We strongly believe that any of these companies will deliver an above-average solar conversion experience and equipment that will help maximize your savings over time. Overall, we recommend SunPower or ADT Solar for most Ohio solar customers.

Ohio has a statewide net metering policy, which means you can get bill credits for excess energy your system produces. When solar customers generate more energy than they use in a month, the customer will be billed the appropriate monthly charges and credited for net metering energy with a cumulative kilowatt-hour (kWh) credit on their bill.

Below are some the criteria we examined specifically for Ohio solar companies Brand reputation and certifications (20%): We take each company's Better Business Bureau (BBB) score into consideration, as well as how long the installer has been in business (at least 5 years is required, 10 preferred) and what type of solar certifications it holds.

Solar Connection is a leader in the installation & maintenance of residential & commercial solar panel power systems across Ohio, saving you money from day one. top of page 330.880.0548

Kokosing Solar brings more than 22 years of solar installation experience and 71 years of construction experience to homeowners, businesses, and organizations. Our team of solar consultants, designers, financing experts, NABCEP-certified installers and licensed electricians work together to make the process of going solar easy for our clients.

With utility rates increasing 4.7% on average each year, going solar is a smart choice to avoid losing money to utility rate hikes. When you're generating power from the sun right on your roof and using local net metering policies, you can spin your electric meter backwards and have the power company paying you.
