

Solar company quebec

Who is Quebec solar?

Quebec Solar was born out of the need for a local professional company in Montreal to Design and Install Solar Photovoltaic Power Systems. Based in Montreal, Quebec we provide complete design, installation and support services to individuals or companies who would like to move toward green energy and independence.

Is Quebec a good place to install solar power?

Quebec is currently ranked the #12 province in the country for installing a solar power system, but scores as one of the best provinces for sunlight levels. This page contains all relevant information about installing solar in Quebec including utility policies, system financing, solar incentives, and natural factors - updated as of Sep 9, 2023.

Are solar panels a good investment in Quebec?

The main obstacle to the widespread use of solar panels in Quebec is the substantial upfront costs, combined with limited yearly savings. In Quebec, electricity rates are low, so it takes more than 10 years to recover the initial investment through savings on your electricity bill. Can solar panels help you save?

How much electricity can a solar system produce in Quebec?

According to data from Natural Resources Canada, the average solar system in Quebec can produce 1183 kWh of electricity per kW of solar panels per year. Here is how much an average solar system can produce each month, as well as the solar irradiance potential map for Quebec:

How much does a solar system cost in Quebec?

To calculate this, you just need to know the size of the system in units of kW. The rough calculation is simple. Just take the size of your system and multiply it by the \$3.03/watt - the average cost of installing a solar system in Quebec. You can calculate your total system costs with the following equation:

Who makes the best solar panels in Canada?

If you're looking for a product that functions well, no matter the situation thrown at it, GMA Solar panels are the top PV modules in Canada. Products from Sun Power Company is the only manufacturer of Solar PV modules in Quebec, Canada.

The solar industry experienced exponential growth over the last decade as costs fell and favorable policies helped drive mass adoption. However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar bankruptcies based on our industry data, a number unseen ...

Sample calculation. In Quebec, an average-sized detached house uses roughly 25,000 kWh of electricity a year. An installation comprising sixteen 300-watt (W) photovoltaic solar panels (for a total installed capacity
