

Solar company replace roof

Can you replace a roof with solar panels?

Simply put, you can't replace a roof while it has solar panels on it. So, when a home with roof-mounted solar panels needs a new roof, the solar panels have to come down. Modern solar panels for homes and businesses are often guaranteed to produce energy efficiently for 25 to 30 years. In theory, that's not a major issue.

How much does it cost to replace a roof before solar?

If you have an asphalt roof over 5-10 years old, you'll probably want to replace it before going solar. Replacing your roof and installing solar costs about \$30,000. If you need to replace your roof after you install solar panels, expect solar panel removal and reinstallation to cost anywhere from \$1,500 to \$6,000.

Can you install solar panels and a new roof at the same time?

When you install solar panels and a new roof at the same time, it's very unlikely you'll need to re-roof during your system's lifetime. Solar panels are more durable than most roofing materials and can extend the life of the roof shingles they cover. Replacing your roof and installing solar panels will probably cost about \$30,000.

Is a new roof compatible with solar panel reinstallation?

It's important to ensure that the new roof is compatible with solar panel reinstallation. Panel reinstallation: Once the roof work is complete, the solar panels need to be reinstalled. This stage might require a reassessment of the panel layout or system configuration to optimize performance on the new roof structure.

Do roof-mounted solar panels need a new roof?

So, when a home with roof-mounted solar panels needs a new roof, the solar panels have to come down. Modern solar panels for homes and businesses are often guaranteed to produce energy efficiently for 25 to 30 years. In theory, that's not a major issue. If both are ready to be replaced at the same time, it might even be convenient.

Is your roof ready for solar panels?

Keep reading to learn why it's smart to make sure your roof is in good shape before you install solar panels and how you can tell if your home is ready. Solar panels and roof shingles have similar life spans, so it makes sense to install roof-mounted solar panels soon after you get a new roof.
