Positioned as a solar ETF, TAN is perfect for people who believe solar energy is the most viable renewable energy source for the future. Note it does not include popular companies like Tesla, which does operate in the solar industry through their Powerwall product offering, although it is obviously not its primary focus.

What are Solar Energy ETFs? Solar energy ETFs are exchange-traded funds that provide investors access to investments in the solar power industry. As of May 2020, there is only one ETF strictly devoted to solar energy - the Invesco Solar ETF (TAN). However, solar energy equities are part of the holdings of several renewable energy, or clean ...
