

A new study by Aarhus University and DTU shows that Europe can achieve climate neutrality by 2050—even if each country produces as much energy as it consumes. With smart solar ...

This study focuses on the statistical analysis of the physical parameters of solar flares based on data from the Solar Dynamics Observatory (SDO). Solar flares are powerful explosions in the ...

Last Updated on July 22, 2025 by Admin Here is the list of the top 100 journals with the highest impact factor in 2025. This list will help in selecting good impact factor journals for submitting your research/review articles. ...

- DTE Energy sues St. Clair County over stricter solar project rules, challenging Michigan's 2023 preemption law (Public Act 233) designed to fast-track clean energy goals. - The case reflects national tensions between local restrictions ...

Transitioning to a decarbonised energy system by around 2050 is expected to save the world at least \$12 trillion, compared to continuing our current levels of fossil fuel use, according to a peer-reviewed study by Oxford ...

Clean Energy Latest GOP Provisions in Budget Bill Seek to Crush Renewable Energy Last-minute additions to the Senate draft of the budget reconciliation bill would accelerate the rollback of Biden ...

The rapid expansion of renewable energy, particularly solar and wind power, is crucial for achieving carbon neutrality in the energy sector. By 2030 and 2060, renewable energy is projected to account for 40% and 80% of ...

A scientific article is one where research is presented (original articles), compiled, or reviewed (review articles). The article is published in a scientific journal and thus becomes accessible to ...

The new tax provisions "lock in death and illness to up to 100,000 Americans every year due to fossil-fuel and bioenergy-fuel air pollution that wind and solar help to eliminate," he said.

By 2030 and 2060, renewable energy is projected to account for 40% and 80% of global electricity generation, respectively. 1 Despite climate change offering potential benefits for renewable energy development, such as ...
