Are home solar panels a good idea?

Despite being a leading clean energy technology, there is still a lot of mystery surrounding installing home solar panels. There are several benefits to getting solar panels for your home, like electricity bill savings and powering your home with clean energy.

Why should I get solar panels for my home?

There are a handful of reasons to get solar panels for your home, but the biggest one is energy cost savings. Home solar is simply much cheaper than paying for grid electricity, and can lead to tens - sometimes hundreds - of thousands in savings over the warranty period of the panels.

Can solar panels power a home?

Solar panels are used to power everything from calculators to sports stadiums to satellites -- and they can just as easily be used to power a home. You don't need to be a rocket scientist - or anything close to it - to get solar panels for your home.

Why should you buy a solar-powered home?

How exciting! Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent. And thanks in part to investments from the Solar Energy Technologies Office, the cost of solar energy is coming down every year.

What are the best solar panels for homes?

Panasonic Solaris is our top pick for the best solar panels for homes. Instead of focusing on one or a few products that could work for any situation, the company continues to develop a wide selection of high-quality and versatile product lines to ensure consumers can install the solar panels and products best suited to their homes and needs.

Should you choose solar energy for your home?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. Homeowners should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

Solar panels on houses are considered "permitted development" and don't usually need planning permission. But there are exceptions so it's best to check with your local planning office for guidance. For example, there may be extra restrictions if you live in a: ...

SolarReviews" Pre-Screened Solar Pros. SolarReviews has a network of over 700 pre-screened solar pros who will provide an exact price for the system your home needs. They are among the highest-rated solar companies in America. Most are local and family-owned, offering much better customer service than large national solar
