Our solar panels are designed to significantly decrease your electricity bills by up to 100%, depending on your energy needs and the installed system. Additionally, our net metering feature allows you to send any excess units generated by your solar panels back to the electricity company, resulting in further reductions to your energy bills.

Often companies involved in selling solar panels to consumers don't treat their customers properly. Sometimes they damage people's roofs while they're installing the panels. Sometimes they sell the entire residential solar system to a company you've never heard of - and that company starts abusing the consumer.
