The first part is the power optimizer, which handles DC to DC and optimizes or conditions the solar panel's power. There is one power optimizer per solar panel, and they keep the flow of energy equal. For example, with a standard string inverter, if one solar panel produces less energy, all the solar panels in that string will produce less energy.

?Ready to Install? This Renogy Solar Kit includes the equipment necessary for building a new system, such as necessary cables, Z-brackets, and pre-drilled holes on the back frame of the panel, allowing fast and secure mounting.
