

Solar panel rebate 2023

Where can I find solar rebates & tax credits?

You can use the Database of State Incentives for Renewables & Efficiency (DSIRE) to find rebates and state tax credits available in your ZIP code. Some states have a statewide tax credit that you can apply in addition to the federal solar tax credit.

Can I claim a solar PV tax credit in 2023?

Yes. Generally, you can claim a tax credit on the expenses related to the new solar PV system that already came installed on the house for the year in which you moved into the house (assuming the builder did not claim the tax credit)--in other words, you may claim the credit in 2023.

How does a utility rebate affect a solar tax credit?

When this is the case, the utility rebate for installing solar is subtracted from your system costs before you calculate your tax credit. For example, if your solar PV system installed in 2022 cost \$18,000, and your utility gave you a one-time rebate of \$1,000 for installing the system, your tax credit would be calculated as follows:

Do solar tax credits expire after 2034?

However, any unused solar tax credits that remain after 2034 will expire. After installing solar panels, you can claim the tax credit on the IRS filing that corresponds to the year you installed your system. For example, a solar installation completed in June 2024 would generate a federal tax credit that the owner could claim in April 2025.

What is the new solar tax credit for 2033 & 2034?

That will decrease to 26% for systems installed in 2033 and to 22% for systems installed in 2034. If you've already installed a system in 2022, your tax credit has increased from 22% to 30% if you haven't already claimed it. The solar+storage equipment expenses included in the ITC have expanded.

How does the solar tax credit work in 2022?

Congress implemented the Inflation Reduction Act in 2022, which brought several significant changes to the solar tax credit. Most notably, it extended the timeline to 2035 and increased the credit amount from 22% to 30% through 2032. Those who installed a system in 2022 and haven't claimed the credit yet can increase their credit amount to 30%.
