

# Solar panels for charging mobile phones

Should you use a portable solar panel Charger?

Typically, portable solar panel chargers are meant to function as a source of backup power, not as the primary way to charge your phone every day because of their slow charging speed. The quality and efficiency of solar-powered phone chargers are getting better all the time.

What are the different types of solar phone chargers?

There are two types of solar phone chargers: Direct solar chargers connect the solar panels to your phone, so the energy produced by the panels goes directly into your phone's battery. A battery bank solar charger doesn't get hooked up to your phone.

Can You charge a phone from a solar panel?

Phones and laptops prefer a consistent flow of energy, but the power of output of solar panels varies based on weather conditions and the angle of the sun. Some phones will refuse to charge from a panel that's fluctuating in output, so it's always best to use the panel to recharge a portable power bank first, then charge your devices from that.

Do you need a solar phone charger?

You might find yourself relieved to have a solar phone charger on hand, which not only tends to be lightweight and easy to carry around, but these gadgets effectively leverage the sun's power to power up your devices.

How does a battery bank solar charger work?

Direct solar chargers connect the solar panels to your phone, so the energy produced by the panels goes directly into your phone's battery. A battery bank solar charger doesn't get hooked up to your phone. Instead, the panels charge a solar power bank that you can then plug your phone into later when it needs a boost.
