

Solar panels for pillar lights

What are solar powered pillar lights?

Solar-powered pillar lights generally come with a ground spike, hence they are flexible. They can be easily moved to a different location. They are perfect for design fans. Tip: solar-powered pillar lights are best positioned where they can soak up a lot of sunshine during the day. Otherwise the battery won't charge fully.

What are the different types of solar powered lighting products?

Our range of solar lighting products include smaller fairy lights and outdoor string lights, stake lights, lampposts and even novelty themed lights. So, if you 're looking for a subtle twinkle, or need to illuminate a pathway, then we will have the perfect solar powered lighting solution for you.

Can you put a light on a brick pillar?

A brick pillar or stone column can be nicely finished off with a pedestal light on top. But if you have no power there then the solution is to use a solar powered light. We have a selection of solar LED lights suitable for a pillar or column.

Are solar pillar lights worth it?

There are no electricity costs and a tangle of cables is a thing of the past. Solar-powered pillar lights generally come with a ground spike, hence they are flexible. They can be easily moved to a different location. They are perfect for design fans.

What Pillar lights should I buy?

Durability is desirable. Robust stainless steelticks the box here. You can also get pillar lights made of aluminium and other metals, which are suitable for use outside. In order to ensure that the bulb is well-protected but can still shine brightly, glass or plastic lampshades are a good option.
