

Solar power alberta grants

What solar incentives are available in Alberta?

Alberta offers a wide range of provincial solar incentives including: On-Farm Solar Program: Designed to reduce carbon emissions in the agricultural sector, this program offers an incentive of up to \$.60 per installed watt up to 25% of project cost, with a \$50,000 or 100kW cap.

Does Alberta have a solar program?

Unfortunately, the large Energy Efficiency Alberta Residential and Commercial Solar Program is no longer available. However, several regional incentives exist for Albertan homeowners: Note that all provinces also have access to the Federal Greener Homes Rebate of up to \$5,000. This could reduce the cost of a 7.84kW system from \$23,285 to \$18,285.

How many energy incentive programs are available in Alberta?

There are at least 6 other energy incentive programs available in Alberta. While not considered in our solar rankings, many homeowners choose to leverage these (i.e., home energy efficiency incentives) around the same time they switch to solar. Production Potential: 1276kWh per kW per year

Does Alberta have a solar rebate program?

Alberta is one of the most abundant provinces in the country when it comes to regional solar energy incentives. It does not have a provincial rebate program, but several regional programs exist. These factors are important because they reduce the upfront system costs. We've scored Alberta 7/20 for this section.

How do I find out more about Alberta solar programs?

To find out more about Alberta solar programs and receive free quotes for your solar panels installation, please fill out a request form, and we'll get back to you within 24 hours!
