

Solar power auction

How does a solar auction work?

Bidding takes place over a specified time period. The auctioneer acts as an intermediary between the buyer and seller. However, the auctioneer doesn't take possession of the solar equipment. One of the most unique value points about EnergyBin is that it is an exclusive network of PV professionals from across the supply chain.

What does a solar auctioneer do?

The auctioneer acts as an intermediary between the buyer and seller. However, the auctioneer doesn't take possession of the solar equipment. One of the most unique value points about EnergyBin is that it is an exclusive network of PV professionals from across the supply chain. EnergyBin attracts PV professionals from around the world.

Should you sell your solar equipment at a solar auction?

The flexibility to sell single parts comes in handy for legacy models or project leftovers that attract buyers who are looking for replacement parts. While on auction sites, solar equipment lot sizes are large (usually starting at 500 kilowatts and spanning into megawatt levels).

Can a wholesale solar company sell surplus solar equipment?

Wholesale solar companies have two main options for selling excess, surplus, clearance, and used PV equipment in the secondary market. They can utilize auction sites, and they can join EnergyBin, the wholesale solar B2B exchange for the world's PV professionals.

Where can I find commercial solar energy?

Welcome to Salvex Marketplace, your source for commercial solar energy. Browse surplus, salvage, and discounted options from insurance sales, bankruptcy assets, auctions, and wholesalers. Find high-quality solar energy at competitive prices for your projects.

Are energybin auction sites reputable?

EnergyBin has many reputable resellers that work with buyers on inspection terms. They recognize the importance of preserving their business reputations. Whereas, auction sites promote AS IS, WHERE IS and usually don't allow buyers to inspect lots in advance to purchase.

The auction drew participation from several prominent renewable energy companies, including ACME Solar, SAEL, OnWard Solar Power, Essar Renewables, and NTPC Renewable Energy Ltd. (NTPC REL). Four of the companies--ACME Solar, SAEL, OnWard Solar Power and Essar Renewables--emerged as successful bidders, securing projects at a tariff of ...
