

Solar power broker

Who are solar brokers?

We're Brokers. Unlike solar manufacturers and installers, we are impartial and offer unbiased services and solutions. This means we will find you the best possible solar design for you and your home that provides the most amount of energy savings through trusted partnerships. Solar energy is abundant and costs less than traditional electricity.

How does a solar energy broker work?

Based on the market evaluation, the solar energy broker meticulously selects solar energy providers to find the best match. They consider factors such as your energy consumption patterns, location, budget constraints, and sustainability goals to secure the most advantageous solar energy deals.

Should your business partner with a solar energy broker?

When considering your business's energy requirements, partnering with a solar energy broker is a strategic move. An energy broker serves as a valuable intermediary, streamlining the process of solar energy providers and their offerings.

Why do you need a solar energy broker in Australia?

Engaging a solar energy broker at Choice Energy saves you the time and effort of independently evaluating numerous energy retailers and their solar offerings. Solar energy brokers in Australia investigate the options available in the market to identify the best solar energy deals suited to your business's electricity usage.

What is solar brokering?

This is where an emerging career called "solar brokering" has been a game-changer. The concept is simple. Work on your own schedule to provide energy solutions for commercial clients through your existing and new relationships that you build and get paid for doing what you love.

Why do you need a solar broker?

Solar brokers offer support after the sale to help clients get the most out of their solar systems. They help clients troubleshoot problems, monitor their systems, and answer questions. If you are considering going solar, working with an experienced solar broker will help you navigate the complex process. And save you time, money, and energy.

We're combining solar power, batteries, and car chargers. It's a complex project, with multiple moving parts. John said his advice was more peace of mind than anything else, and in the end he was right. Yorba Linda, California business owner, System - ...

"AE Power Brokers doesn't specialize in designing slick web interfaces, and we are not trading SRECs because it is a trendy new business opportunity. We are solar specialists with roots dating back to 2001 when our sister company, Absolutely Energized Solar, began installing some of the first solar systems in NJ."
- Dan Lichtman, Owner

Energy brokers earn a commission from retail energy suppliers for the total energy consumed by their customers over the length of a contract. Unlike energy consultants who charge a fee directly to the customer, energy brokers build energy broker fees into the total rate for energy that appears on the customer's invoice. See more on Energy Brokers vs. Energy Consultants below).
