

Solar power generation batteries are expensive

Is it worth getting a solar storage battery?

A solar battery allows you to store electricity produced by your solar panels and use it later or, in some cases, sell it back to the grid to make a few quid - but they're not cheap. Read on to see if it's worth getting a solar storage battery for your home... This is the first incarnation of this guide.

How much does solar battery storage cost in the UK?

It also touches on the cost of solar battery storage in the UK, which, according to Solar Guide, ranges from £1,200 to £6,000. Expensive? Perhaps it's a stretch, but shaving off a few pounds from your energy bill, might just be worth it!

How much does a battery cost for a given energy Solar System?

EDF Energy sells batteries starting from £5,995 (or £3,468 if you buy it at the same time as solar panels). It fits lithium-ion GivEnergy-branded battery storage systems. E.on Next will fit batteries to existing solar PV systems or as part of an E.on solar installation. It only fits GivEnergy battery systems.

How much does it cost to install a solar battery?

The price of installing a solar battery falls by around £2,000-£3,000 if it's installed at the same time as solar panels. The price of the inverter is already folded into the total amount of a solar panel system installation, and adding a battery doesn't involve much additional labour cost either.

Why are solar batteries so expensive?

Think of it like this: solar batteries aren't too different from the batteries in smaller gadgets like your smartphone or MP3 player. They're just, well, bigger! Utilised in lithium-ion batteries, the most common type of battery for solar storage. The cost of lithium is influenced by its growing demand and limited supply. Prices can be volatile.

Is a solar battery worth the investment?

A solar battery is absolutely worth the investment. It enables you to use more of the electricity your panels generate - which cuts your costs - and allows you to take advantage of the best export tariffs around, massively boosting your savings.
