

Solar power generation glass for watches

What is a solar power watch?

With solar power watches, a new type of underlying technology enters the fold and brings some key benefits along with it. Inside each model is a small solar panel, which absorbs either sunlight or artificial light and then converts that light into energy. Compared to a traditional battery, a solar-powered battery can last about 10 years on average.

Which watch manufacturers use solar technology?

Today, several watch manufacturers besides Citizen employ solar technology, including Seiko, Casio, Timex, and Garmin. We'll get to each one of them and their technologies in more detail later in our post. But before, let's peek into the working mechanism of solar watches more closely. [How Do Solar Watches Work?](#)

How does a solar-powered watch work?

A solar-powered watch makes use of photovoltaic solar cells to accumulate light energy and convert it into power. The watches of this kind are powered by light either entirely or partially. Beneath the dial of a solar-powered watch is a solar panel absorbing natural and artificial light to turn it into electrical energy that will power the watch.

What is Garmin power glass solar charging lens technology?

Garmin's breakthrough Power Glass solar charging lens technology puts our range of outdoor and sports smart watches in a class of their own. Take it to the mountain top or ocean deep, it will draw upon the sun's power to power you to greater feats. Garmin's Power Glass system has shaken up decades of stagnant solar panel technology.
