Do solar panels cost a lot in Montana?

Though solar panels come with a high price tag, there are several solar incentives in Montana that you can take advantage of to lower the cost of your solar panel system. One of the biggest ways you can lower the cost of your solar panels is through the federal solar tax credit called the Investment Tax Credit.

What solar incentives are available in Montana?

The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. Some states and utility companies offer additional solar incentives, saving homeowners even more money. Here are the solar incentives available in Montana:

Do solar panels save energy in Montana?

Montana receives about 201 sunny days per year, which is in line with the national average of 205 sunny days. Solar panels are only as efficient when they receive direct sunlight, so homes in Montana that get a lot of sunlight will have a higher potential for energy savings with solar panels.

Is solar a good option in Montana?

Montana homeowners use an average of 858 kWh monthly, which is higher than the national average. As such, most residents will find that solar is a good option for meeting their energy needs. You can check your average monthly consumption on your past electric bills. (How Much Is It To Go Solar in Montana?)

Does Montana have a solar tax credit?

Montana does not have a state solar tax credit. However, homeowners can take advantage of the federal solar tax credit, which allows you to deduct 30% of your solar installation costs from your federal income taxes. That's thousands of dollars in savings!

What is the interest rate for solar panels in Montana?

Montana currently offers the Alternative Energy Revolving Loan Program (AERLP), which provides low-interest loans to Montana residents. As of 2023, the interest rate for purchasing solar panels through AERLP is 3.5%, with a 4.023% APR. Find a network of trusted installers for your solar system, solar panels and electricity needs.

Montana has low electricity rates, making solar power a cost-effective choice that can save homeowners up to \$14,000 over 25 years. Net metering is also available but with a 12-month credit expiration limit. Montana Solar Power Incentives, Tax Breaks, and Rebates
