

Solar power infrastructure bill

How will Biden's bipartisan infrastructure law affect solar projects?

Eight projects to be selected for award negotiations because of President Biden's Bipartisan Infrastructure Law will focus on reducing the cost and increasing the efficiency of panel recycling processes. As solar deployment increases, the end-of-life of photovoltaic (PV) components needs to be considered.

What is a \$15 billion solar energy investment?

The investment would include \$15 billion in demonstration projects for climate R&D priorities, including utility-scale energy storage, carbon capture and storage, hydrogen, floating offshore wind, biofuel/bioproducts, and electric vehicles. The solar industry and broader clean tech sector greeted the proposal with near-uniform support.

Can Biden help reduce solar cost?

Build Back Better investments proposed by President Biden can help DOE achieve these solar cost reductions. Investments in clean energy R&D, supply chains of critical materials, and tax cuts for new and retooled factories for advanced energy manufacturing will help lower costs across the solar lifecycle.

Is the \$2 trillion solar energy package too industry-friendly?

The \$2 trillion package includes a proposed 10-year extension of the ITC and PTC and calls for further incentives to add transmission capacity. Most solar advocates liked it, but one nonprofit panned it as being too industry-friendly.

Why is the Biden administration investing in solar?

The Biden Administration is committed to continually investing in solar innovation and lowering the cost of energy for families and communities across the country.

What are the benefits of residential Distributed solar energy?

Residential distributed solar energy will lower energy costs for families, create good-quality jobs in communities that have been left behind, advance environmental justice, and tackle the climate crisis.

-- The Biden-Harris Administration, through the U.S. Department of Energy (DOE), today announced \$26 million to fund projects that will demonstrate that America's electricity grid can reliably run with a mix of solar, wind, energy storage, and ...

WASHINGTON (June 28, 2023) - Today, the U.S. Environmental Protection Agency (EPA) launched a \$7 billion grant competition through President Biden's Investing in America agenda ...

Solar power infrastructure bill

The infrastructure deal will: Invest more than \$7 billion in the supply chain for batteries, which are essential to powering our economy with 24/7 clean, affordable, and resilient energy and transportation options.

-- As part of President Biden's Investing in America agenda, the U.S. Department of Energy (DOE) today announced \$52 million for 19 selected projects, including \$10 million from the Bipartisan Infrastructure Law, to strengthen America's domestic solar supply chain, and \$30 million in funding for technologies that will help integrate solar ...

On November 12, 2021, the U.S. Congress passed a key part of President Biden's agenda (and solar policy): a \$1.2 trillion bipartisan infrastructure bill. It contains plans to invest \$550 billion in American infrastructure over the course of five years.

This is why the Solar Energy Technology Office at DOE set a new 2030 goal of cutting the cost of solar (PV) to \$0.02 and \$0.05 per kilowatt-hour without subsidies, for utility and residential...

Here's what Biden's infrastructure bill offers solar and cleantech. The \$2 trillion package includes a proposed 10-year extension of the ITC and PTC and calls for further incentives to add transmission capacity. Most solar advocates liked it, but one nonprofit panned it as being too industry-friendly.

The Bipartisan Infrastructure Deal will deliver \$65 billion to help ensure that every American has access to reliable high-speed internet through a historic investment in broadband...
