The cost of solar power in New Zealand. While solar power has long been a favourite of environmentalists and those seeking a self-sustainable lifestyle, solar panels have also traditionally been expensive and outside the budgets of the average New Zealander. However, this is changing with a dramatic decrease in prices over the last ten years.

1. Panels (25.2%): Panels, making up 25.2% of the cost, convert sunlight into electricity. Their quality and type affect overall efficiency and cost. 2. Installation (25.8%): Installation is the largest cost at 25.8%, covering labor, mounting equipment, and materials for safe, optimal setup. 3. Inverter (18%): Inverters account for 18% of the cost, converting DC ...

In 2023, a typical 5 kW solar power system in New Zealand costs around \$13,500. Like most other things, the larger a system, the lower its cost per watt. For instance, a small, 2 kW system may cost around \$7,500, which ...
