

Solar power long island

What are the benefits of having a solar power system on Long Island?

You use the power your Long Island Solar Solutions System generates and draw power from the power grid when needed (for example, at night). During the day it's common that you'll generate more power than you need. This excess power is sold back to your utility company via the power grid at the same price you pay.

How much power does the Long Island Solar Farm produce?

The Long Island Solar Farm (LISF) is a 32-megawatt solar photovoltaic power plant built through a collaboration including BP Solar, the Long Island Power Authority (LIPA), and the Department of Energy.

What collaboration was necessary to build the Long Island Solar Farm?

The Long Island Solar Farm (LISF) is a 32-megawatt solar photovoltaic power plant built through a collaboration including BP Solar, the Long Island Power Authority (LIPA), and the Department of Energy.
