What is solar energy?

Solar energy is energy generated from the sun. It is energy that moves through space and matter and is commonly referred to as free sunlight. It is also known as energy fueled by natural processes and global solar radiation.

What are the different types of solar power?

The two most common are photovoltaic (solar cells) and concentrating solar power. Solar cells convert sunlight directly into electricity. The amount of power generated by each cell is very low. Therefore, large numbers of cells must be grouped together, like the panels mounted on the roof of a house, to generate enough power.
