Does Windsor have solar panels?

Through the installation of solar panels and net metering systems, the city is estimated to save 1.1 million kilowatt hours each year and more than \$220,000 in annual electricity costs. Three city-owned buildings already have solar panels installed: the WFCU Centre, the downtown aquatic centre, and the Transit Windsor headquarters.

Will a new solar system save Windsor's energy costs?

The roofs of a dozen city-owned buildings will have \$2.4 million in solar panel systems installed over the next year to save energy costs, improve energy performance, and mitigate climate change. The project implementation is another step in fulfilling the city's community energy plan, said Windsor Mayor Drew Dilkins on Tuesday.

How can I reduce my solar installation cost in Windsor?

These programs can significantly reduce your upfront costs. Residents of Windsor can take advantage of the federal ITC, which provides a tax credit of up to 30% of the total solar installation cost. Windsor Hydro, the local utility company, offers net-metering programs, allowing you to sell excess solar energy back to the grid.

How much energy does Windsor save a year?

In a press release, the City of Windsor estimated that the new upgrades will save 1.1 million kilowatt-hours of energy per year and more than \$220,000 in electricity costs. The \$2.4-million investment aligns with the city's larger strategy to address climate change and cut energy use, which council passed in 2017.

What is Windsor doing to create a smart energy future?

Windsor Mayor Drew Dilkins made the announcement alongside Ward 5 Coun. Ed Sleiman and the city's manager of energy initiatives Sokol Aliko. "Today's investment is another step that the city has taken to create a smart energy future," said Mayor Drew Dilkins. Construction is expected to be completed by the summer of 2023.
