If you need to generate a system with such a world, it is preferable to force it. Note that even a garden-type world may be very cold or hot, as long as it falls in a range that humans can live in! If you want your star system to be located in an open cluster (which makes for close neighboring systems to explore) check the box.

During the Horus Heresy Uranus and the Elysian Gate became the center of Rogal Dorn's Second Sphere of defense around the Sol System under the command of Imperial Fists Captain Halbrecht. In the subsequent Solar War the Uranus region was the site of massive fighting as the Iron Warriors launched an assault to capture the Elysian Gate.

The manpower numbers in 40k is something that needs to be fixed. Reply reply ... If Guilliman reaches the solar system before terra falls then the loyalists are very likely to win. One of Dorn's main flaws is that he doesn't really factor warp shenanigans. He knew something was suspicious but he couldn't expect Horus, the Emperor's Children and ...

Solar power systems produce more in summer than in winter! As an example, a perfectly efficient 40kW solar system in Sydney, NSW would produce about (3kWh x 40kW =) 120kWh of power on a day on the shortest day of the year. The summer output from the same 40kW system would be approximately (5kWh x 40kW =) 200kWh.
