What is a solar map generator?

A tool for generating and mapping solar and extra-solar systems. Designed for minimal/symbolic representations and to be used as maps. May I use this in my project? You can use any images created in this generator royalty free. Attribution would be great, but is not a requirement. Why does the clear/random button do nothing?

How do I create a randomized Solar System?

There are two parts to this tool. The first, seen directly below, is the randomizing version. Simply click the 'Randomize solar system' button, and it'll automatically generate a randomized solar system. Click any of the planets in it, and you'll be presented with basic information in the fields below the button.

What games can I play with a solar system module?

It is designed to help masters of games like Traveller, Starfinder, Stars Without Number, Ultramodern5, Eclipse Phase, Dune Adventures, Star Trek Adventures, Alien RPG, Warhammer 40.000 or Star Wars RPG among others. This module contains many algorithms that will shape as realistically as possible a solar system.

Battle maps are an essential part of many tabletop RPGs. They can be as simple as a single room or as complex as a vast underground dungeon. Both simple hand drawn and extravagantly artistic battle maps are welcome here. Tutorials describing map creating tips and tricks are also welcome. Check out the weekly megathread for discussions and requests!
